Phoenix and Irvine Regional Events Explore Transformative Technologies: Opportunities and Challenges For Your Business

At the February Regional Series events Sam Lucero, senior analyst at IHS Markit, will provide an overview of how transformative technologies are converging to reshape industries - specifically taking a deep dive into automotive markets. Sam will show how these technologies are presenting both opportunities and challenges for

automotive players.

While technologies such as AI, IoT, computer vision, and the cloud are not new, they are converging at an accelerated pace, fundamentally changing the automotive industry, and enabling the shift from connected to autonomous vehicles. Learn what this means for your business.

Join us and enjoy a hosted social hour and dinner in a relaxed environment. The meetings provide an excellent avenue to introduce your team to the association and industry peers. [Click here for information on events in your area.](#)
